

Park West Boulevard

Public Information Meeting

October 26, 2017
Park West Gym
5:00 P.M. – 7:00 P.M.
Mount Pleasant, SC

Meeting Purpose

The purpose of this meeting is to provide information related to the proposed project and to solicit input from area residents, businesses, and commuters of the corridor. Engineering and Environmental personnel from the Town of Mount Pleasant and the Consultant team will be available to answer questions and discuss the project on an individual basis.

The Project

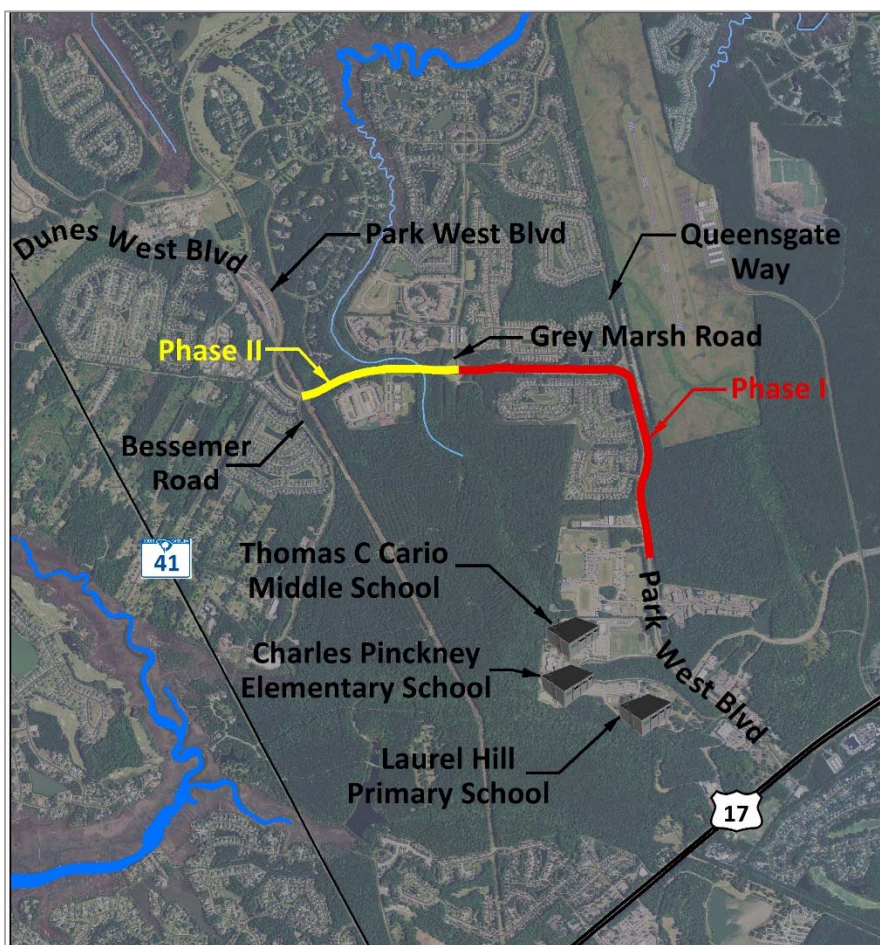

The Town of Mount Pleasant is proposing the widening of Park West Boulevard to four lanes, matching the existing four lane section of Park West Boulevard near the Park West Recreation Facility and ending at the Bessemer Road roundabout.

Purpose and Need

The project is located within the Town of Mount Pleasant and serves as the primary access for residents of Park West to US 17 and, by means of Dunes West Boulevard, to SC 41. The Corridor also provides access to schools, recreation facilities, as well as businesses and residences located along Park West Boulevard. The primary purpose of the project is to improve traffic congestion within the Corridor. The project will also improve drainage, provide safety improvements, and consider providing facilities for cyclists and pedestrians for improved multi-modal transportation.

Project Description

The consultant team, in partnership with the Town of Mount Pleasant, has developed conceptual typical sections of several potential cross sections for use within the vicinity of the project corridor. The project improvements will be divided into two phases for construction. Phase 1 will include improvements from the existing four lane section near Park West Recreation Facilities to the existing roundabout at Grey Marsh Road, including improvements to the existing roundabout at Queensgate Way. Phase 2 would extend from the Grey Marsh Road roundabout to just east of the roundabout at Bessemer Road.

After Today's Meeting

The Town of Mount Pleasant will collect public feedback from today's meeting. The Town will use this feedback to further develop the potential typical sections and alignments. Public involvement is an important part of the planning process, and the Town values your opinion. Thank you for your participation.
