

TRASH

TIPS FOR CURBSIDE DEBRIS PLACEMENT

SEPARATE

Separate different debris items into different piles

CUT LIMBS

Cut limbs into 4' long sections

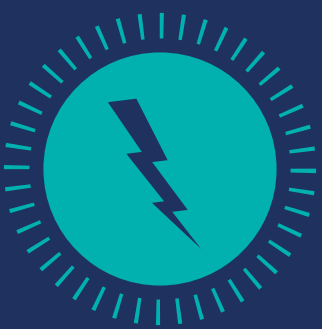

DON'T HOG THE ROAD

Make smaller piles to allow for safe vehicle travel

KEEP A DISTANCE

Keep debris piles away from ALL utilities so we don't damage them during pick-up. This includes: stormwater, electric, cable, storm drains, mailboxes, etc.

BAG IT

Bag loose debris for collection

SWEEP

Sweep curbs of all debris to a paper bag for removal – clear your storm drains to limit flooding until debris can be collected
